SEED CORN & TOBACCO SEED GOVERNMENT TESTED

I have a very fine grade of pure bred pedigreed seed corn of the different varieties, which was planted early and grown especially for seed and shows a germination of 98 to 100% which I offer at the following prices as long as it last.

Prices as follows:	Bushel	$\frac{1}{2}$ bushel	$\frac{1}{4}$ bushel
Pedigreed 90 day Yellow Dent	\$2.90	\$1.75	\$1.00
Pedigreed Boone County White	2.90	1.75	1.00
(Special) Pedigreed 80 Day White Dent	2.90	1.75	1.00
St. Charles White or Eureka silage Corn ..	2.90	1.75	1.00
Kentucky White Dent, 100 day corn	2.90	1.75	1.00

This 80 Day White Dent absolutely matures in 80 days. The 90 day Yellow Dent and Kentucky White Dent also matures before the summer drought has a chance to hurt it and gives a chance to do early seeding of small grain.

This corn is all hand sorted nubbed and tipped before being shelled and should not be classed as ordinary seed corn shelled through shellers and sold by large Seed Houses.

One bushel of good seed corn will plant 7 or 8 acres. A bushel of SEED CORN that increases the yield 10 bushels per acre adds \$60.00 to \$75.00 profit on 8 acres. Do not plant scrub corn.

Bags furnished for one bushel or less at 25¢ each and bags holding over 1 bushel up to $2\frac{1}{2}$ bushels at 40¢ each.

Place your order today, it means profit to you.

TOBACCO SEED

I can furnish Judy's Pride, Kelly or Ky. Broad Leaf Tobacco seed, all root rot resistant strains, at \$1.00 per oz. or 3 oz. \$1.75. Good seed is scarce this season as most tobacco was too late to mature seed last year.

JOHN A. SHEEHAN, Falmouth, Ky. R.D. No. 4.
